Note, That on what Day of the Week the Year begins, the Figure under each Month, is the same Day of the Week until the Years end. Again, if G be the Dom. Let. for the Year, then all the Figures under each

each Month are *Sund.* if F is the Dom. Let. then all the Fig. under each Month are *Mon.* when E, all the *Tuesf.* when D, all the *Wed.* when C, all the *Thursf.* when B, all the *Fr.* and when A, all the *Sat.* To know what day of the Week the 25th of March will fall upon for ever.

This Year 1714, the 25th of March is upon *Thursday*, 1715, it will fall upon *Friday*, 1716, *Saturday*, 1717, *Sunday*, 1718, it will fall upon *Tuesday*, and so by leaving out one Day, between every fourth Year, you have the Day of the Week, on which the Year begins, i. e. The Day of the Week the 25th of March will fall upon for ever.

A Table to find the Moveable Feasts for ever.

Seek first in the Revolution Table, the day on which Easter falls in the year you desire, then find in this Table, under the Title easter-day, the same day, and against it in a straight Line are the rest of the Moveable feasts. Or, you may, Seek the Change of the Moon in February, for the Year, the new Tuesday, after, is Shrove-Tuesday, but if the Change

You may Count 'em thus, Septuagesima Sunday is 9 Weeks before Easter; Sexagesima is 8 Weeks before Easter, Quinquagesima or Shrove Sunday is 7 Weeks before Easter, the Tuesday after is Shrove Tuesday, and the Wednesday following is Ash-Wednesday, or the first Day of Lent; Quadragesima or the first Sunday in Lent is 6 Weeks before Easter, Midlent Sunday is 3 Weeks before Easter, Passion Sunday is a fortnight before Easter, Palm Sunday is a Week before Easter, the next Thursday after Palm Sunday, is Maundy Thursday, the Day whercon Our Saviour gave to his Disciples a New Commandment i. e. *That ye Love one another*, and in the Evening of the same Day, after His last Supper, and before He Instituted the Blessed Sacrament, Washed his Disciples Feet in the 33d. Year of his Life; the next Day being Good Friday He was Crucifix'd and Buried. The Sunday following is the Resurrection of the Holy JESUS, after his 3 Days Interment in the Grave, or Easter Day (which always falls between the 21 of March and the 26 of April Exclusive,) the next Sunday after Easter is Low Sunday, to which add 4 Weeks, so have you Rogation Sunday, then it is 4 Days more to the Ascension of Our Blessed Lord. (40 Days after His Resurrection, during which time He Convers'd with His Apostles, eating Meat with them, discoursing and instructing 'em in those things, that appertain to the Kingdom of God.) From which proceed forwards ten Days for Whit-Sunday or the descent of the Holy Ghost upon the Heads of the Apostles and other Christians, like Cloven Tongues of Fire. This is the time of Pentecost, so call'd, because there is 50 Days betwixt Easter and Whit-Sunday inclusive. The Jews kept their Pentecost 50 Days after the Passover, in Remembrance of the Law deliver'd to Moses in the Burning Mount Sinai. The next Sunday after is Trinity Sunday, and the next Thursday Corpus Christi.

The 3 Rogation-Days are the Monday, Tuesday and Wednesday before the Ascension of our Lord or Holy Thursday, which is always the next but one before Whit-Sunday, and is the time when the Curate, with the young Children and Substantial Men, in Every Parish and Town-ship, make Perambulation, and Procession, to View, and Understand the ancient Limits, and Boundaries, of every Parish, to prevent all manner of Incroachments, Contentions and Suits at Law,

The 4 Ember Weeks i. e. The Ember Days or Feasts of the Seasons (in which the Fruits of the Earth, are either Sown, sprung up, coming to their Ripeness, or gathered into the Barn) are the Wednesday, Friday, and Saturday after the first Sunday in Lent, after Whit-Sunday, after the 14th of September and the 13th of December. And the Sunday following the Wed-

nessday in each Ember Week, is Ordination-Day, in the Church of England. See the Church of England-Mans Companion Page, 82.

The times Prohibited, for Marriage are from after Advent Sunday till 8 Days after Epiphany, from after Septuagesima till 8 Days after Easter, and from 3 Days before the Ascension till Trinity Sunday. Yet I have been told by our Proctors, that the Prohibition used to be, but from advent Sunday till Twelfth tide, and from Ash-Wednesday to Low Sunday.

N. B. In all Civil and Ecclesiastical affairs, we begin the Year upon the 25 day of March, the same day supposed to be the first Day upon which the World was Created, and the same day when Christ was conceived in the Womb of the Virgin Mary. Our Church indeed, as to her solemn Service, Beginneth Her Year upon the first Sunday in Advent, which is always the nearest Sunday to St. Andrews Day, Nov. 30. whether before or after, and is the last of the moveable Feasts in the Calendar. The Regnal Year begins with the King or Queens Reign. Astronomers begin the Year upon the first Day of January, (according to the Circle of the Sun and Moon,) and the Day at 12 a Clock, or high Noon, at which time the Sun is always full South (or in the Meridian, or Culminates.) We account the Day for payment of Money, from Sun Rising to Sun Setting; and for Indictments for Murder the day is accounted from Midnight to Midnight, and so are Fasting days. But tho' our Civil Day begins from Midnight, yet our Religious or Sacred Day, begins at 6 in the Evening, and End at 6 the next Evening, according to the Scripture *Gen. 1st The Evening and the Morning were the first Day, &c.*

The Week begins upon Sunday, because on that Day Christ was Born, Rose from the Dead, and sent his Holy Ghost upon his Apostles, Disciples, and other Christians,

Note, the Epact Changeth on the first Day of March, and the Age of the Moon, the 28th of February every Year.

The Prime or Golden Number, and the Dominical Letter Change always on the first day of January, and every Leap Year hath two Dominical Letters, the first holds to the 25th of February, and the latter to the end of the Year.

But it must be Observ'd that the 19 Golden Numbers which have a Relation to the Calendar in the Common-Prayer Book of the Church of England, Begin with March the 8th, and End with April the 5th, and are plac'd (in a Column) Even with certain Days in every month, in that Calendar,

i. e. in March $\left. \begin{matrix} 3 \\ 11 \\ 19 \end{matrix} \right\}$ is set against the $\left. \begin{matrix} 1 \\ 3 \\ 5 \end{matrix} \right\}$ Day, &c.

which are the Days of the New Moon, See the Calendar in the Common-Prayer Book. The New Moon being thus found, the Full Moon meant in this Rule is the 14th day after Inclusive, i. e. accounting the day of the New Moon for the first. The Sunday after is Easter Day, but if that 14th Day (or Ecclesiastical Full Moon) be it self a Sunday, then Easter-Day is the Sunday following.

Easter-day is always the first Sunday after the first Full Moon; which happens next after the 21st. of March and if the full Moon happen upon a Sunday, Easter Day is the Sunday after.

The Beginning and Ending of Easter and Trinity Terms, you have in the Revolution Table, and their Returns or days of appearance are as followeth, the first return in Easter Term is Quind. Pasch. a fortnight after Easter. 2d. Tres Pasch. 3 Weeks after Easter. 3d. Mens. Pasch. a Month after Easter. 4th. Quind. Pasch. 5 Weeks after Easter, 5th. Craft, asc. the next Day after Ascension-day. The first Return in Trinity Term is Craft. Trin. the next day after Trinity Sunday. 2d. Octab. Trin. 8 Days after Trinity Sunday. 3d. Quind. Trin. 15 days after Trin. 4th. Tres Trin. 3 Weeks after Trinity Sunday.

Note, If the Beginning, Ending, or return Days happen to fall on a Sunday in Hilary or Michaelmas Term, then the next Day following serves for the same Purposes. But at all other times, they begin and end, as in the Table of Remarkable Days, where you will also find their Returns. Now every one of these Returns in each Term, Consists of 4 Days, and every day serving to a several Purpose, viz. The first is Effoyn and Return-day; 2d. is the Day of Exceptions; 3d. is the Day whereon the Sheriff must Return the Writ; and the 4th. is the Day of Appearance for all Parties.

Remarkable Days in the Course of the Law, or adapted to some other Secular Account throughout the Year.

To find the New Moon, at any Time.

SEEK first in the Revolution Table the Epact for the Year, to which add the Number of Months from March to the Month propos'd inclusive, and subtract the Sum from 30 (or 60 if it exceed 30) and the remainder is the day of the month on which 'twas new Moon. To the day of the Change add 15, so have you the Full; and by adding 7 Days and 9 Hours to the New or Full, you have the first or last Quarters, and if at any time, you want to know the Moons Age do thus. *viz.* To the Epact and the day of the month propos'd add for Jan. 0 Feb. 2, Mar. 1, Apr. 2, May 3, June 4, July 5, Aug. 6, Sept. 8, Oct. 8, Nov. 10, Dec. 10, (rejecting 30 if need be) So have you the Moons Age that Day, but Subtracted from 30, Leaves the day of the Change in or from the beginning of that Month. Again, to the day of the Month add the Epact and the number of the months from March, to the month propos'd including both months; and the sum is the Moons Age. but if the said 3 Numbers added together exceed 30, you must take away 30, (if the Month you are in hath 31 days) if Less, you must take away 29 and the remainder is her Age.

Thus knowing the Age of the Moon in any Month this Year, and are desirous to know what age she will be the same day of the Month the next year, 'tis but adding 11 to her present Age for the second ensuing, and so on as far as you please.

And if you add 19 instead of a 11 you shall have the Moons Age the preceeding Year, Remembring to reject 30.

To know how Long the Moon Shineth.

ALL the time of her increase, Multiply her Age by 4, but after the Full, see what her Age wants of 30, the which also multiply by 4, and divide by 5, the Quotient gives the Hours, She shineth after Sun-Set, or before his Rising. The remainder Multiply'd by 12, gives the minuits to be added.

N. B. All the increase, the Moon followeth the Sun, and Shineth after Sun-Set, her lightned part Looking into the West, but decreasing, She goeth before the Sun, and shineth before his Rising, her Lightned part looking into the East.

To know when the Moon Riseth, and Setteth.

BEFORE the Full, add the quantity of her Shinning, to the time of the Sun-Setting so have you the Moons setting. and for her Rising, add the said quantity of her shining to the Sun-Rising, and you shall have the Moons Rising. But after the

the full, *Subtract* the Length of her Shinning from the Hour of the Sun Rising, and you have her Rising, the same also taken from Sun setting, giveth the time of her setting, and if *Substraction* cannot be made add 12, and then *Subtract*, and the remainder shews the time of the Moons Rising or Setting.

To find what time the Moon will be full South, and the Hour of High Water, or full Sea at London-Brigde for Ever.

Multiply, her Age by 4, and that product divide by 5. the Quotient will be the Hours, and the remainder of the division the minutes that the Moon is South, (or in the Meridian (to which add 3 Hours, and you have the time of High Water or Full Sea at London, but when the Age of the Moon exceeds 15. you may reject 15, and proceed with the remainder instead of the Moons Age.

N. B. All the increase *i. e.* untill the Moon be 15 Days Old, She cometh to the South in the after-noon; and after the Full, She cometh to the South in the Morning. Note, the Hour of the Moons coming to the South is the time of full Sea at Portsmouth, Quinborough and Southampton, and the distance between Dover and Calais is but about 7 Leagues, or 20 English Miles.

To know what 'tis a Clock by the Moons Skining upon a Sun-Dial.

SEE what the Shadow of the Moon upon a Sun-Dial wants or is past 12 a Clock (for so much it wants, or is past the Hour of her coming to the South that Day) *i. e.* what the shadow wants of 12 a Clock. so much must be *Subtracted* from the time of her *Southing*. And if past 12 a Clock, then added to the time of her *Southing*. And the Sum is the Hour and Minute of the Night.

Some Natural Predictions of Fair and Foul Weather.

Some places have Signs of Rain and Fair Weather, which others have not. Near London and the South Parts of England a South or S. E. Wind, brings most Rain, and a North or West Wind, Dry Weather. on the Contrary about Wotton, by Wolver-Hills in Moreland in Staffordshire, a West Wind produces Rain, but the East or South Wind bring fair Weather. At Edinburgh in Scotland a South Wind brings the fairest Weather, and a N. and N. East, the greatest Wet. In France they seldom have Rain when the Wind is in the East, but frequently when in the West.

When you see little pale Blackish Clouds gather together, 'tis a sign of approaching Wind from that Quarter. — When the

Clouds settle downwards because of their Weight, and being separated from other *Clouds* they press the Air which is under 'em, and so occasion it to *Blow*, — If the Wind be in the North, or North East, and continue so, for 3 Days without Rain, we may expect a Fair Season, and Settled Weather.

If it Rain in the Summer, and the Horses and Kine, do leave off feeding, 'tis a certain sign the Rain will not continue long.

A Dry and Warm March, Protends a plentiful Year, but Floods or hard Frosts and Snow, shews Scarcity of Corn, Especially *Wheat* and *Rye*.

A fine Northerly Wind and Dry Wether in May, is the forerunner of great Plenty of Hay and Corn, but much Rain and Floods Rot the Sheep.

A Warm and moist Winter, makes the Summer after to be very Sickly, but a hard Frosty and Snowy Winter, makes the Year following to be very Plentiful and Healthy.

If in the Morning, Mists descending from the Hills and settle in the Vallies, 'tis a sign that the Day will be Fair.

The Soaring of Kites aloft in the Air, is a sign of Dry and Hot Weather.

Crows Craying early in the Morning, with a Clear and loud Voice, shews the Day will be Fair. --- Much hooping of Owls, after Sun-set, and in the Night also, shews a Fair Day to follow. The flying of Bat-Mice, to and fro in the Evening, shews the next will be a fair Day.

Swarms of little Gnats and Flies, sporting themselves together in the Evening, is a Certain sign that the Day following will be Fair.

If the Sun set Red in the Evening, and the place be free from Clouds, and the next Morning Rises Clear and Bright, the Day will be fair.

If the Sun look Red at his Setting, the Air will be Calm and Clear the next Day.

When that part of the Horizon, where the Sun-Rises or Sets, is of a Bright Red Colour, there are few Vapours in the Air, it then denotes a Continuation of good Weather, especially if the South or West Wind, has not begun to Blow.

If the Weather Change not at the New or Full Moon, nor 3 Days before or after the New or Full. you may expect that it will hold on as it is, till the next New or Full Moon comes.

If the Moon be of a very Clear Light Colour, and not encompassed with a Mist, it will be fair Weather.

Signs of Rain and Foul Weather.

When you see Little Clouds, Heaped one upon another that
H h makes

6 makes the Sky look as if it were curdled. If in the Summer, in a fair Day, you perceive a Cloud gather of a sudden on all sides, and appear Black and curled, prepare your self for Storms of Rain and Thunder.

10 If Crows, Crow or Cry much in the Evening, 'tis a sign of Rain the next Day.

11 Hogs Crying in an unusual manner, and Running unquietly up and down with Litter in their Mouths, forebushes Rain and Storms at Hand.

3 When Rain ceases, Wind begins to Blow If the Winter was Windy, the Spring will be Rainy.

2 If the Sun, when it Rises appear with Spots, or lark under a Pale or Black Cloud, it foretells either Wind or Rain.

2 If the Rising Sun appear Concave, so that it Shines in the middle and casts out Rays, it foretells a Moist and Windy tempest.

2 If the Sun at his first Rising, or some time after, shine paler than ordinary, 'tis a sign of a Wet-Day, especially if the Air be obstructed with thick Clouds.

2 If the Sun Rise pale or Waterish, or appear Hollow, 'tis a sign of Rain When that part of the Horizon where the Sun Rises or Sets, is of a Pale or Yellowish colour, it shews that there are many Vapours in the Air. and foretells bad Weather.

4 If the Sun set in a Cloud, or dark Clouds arise in the East at his Setting, Rain will ensue.

1 If in the Evening, the Sun Set behind a dark black Cloud, and his Body appear greater at that time than Usual, it certainly betokens Wet the next Day. --- An unusal Circle of light about the Moon or Stars, when no Mist or Fog appears below, is a sign of Rain.

It generally begins to Rain, either when the Moon is due South, or else when the Sun comes upon the same Quatter from whence the Wind blows, and if it Rains not at the time of the Moons Southing or Northing, nor when the Sun and the Wind come together, then 'twill hardly Rain till the same times Return again.

12 Frosts, generally break at the Change of the Moon, and tis commonly at the New or Full Moon that Rain comes after a dry Season. --- If the Moon be of a Gold colour, it is a certain sign of Wind. --- a Circle round the Moon, and a sharpness of her Horns are signs of Wind.

If the Moon be encompassed with a Circle like a Wheel, or is Dim and Mitty, Wind or Rain ensue, and Snow (if in Winter)

A Pale Moon foretells Wet, the White brings Rain ;
But when Red, the Air will clear remain.
